REPORT ON CLUB PEER BUDDY SESSION

Club Name: NexaSoul
Domain: Frontend Development
Session: Club Peer Buddy Session
Date: 2 September 2026
Venue: C1 Block, Room 711
Scheduled Time: 3:35 PM – 4:25 PM
Organised As Per: Timetable and instructions received from the Office of Academic Affairs (OAA), Chandigarh University

1. Introduction

NexaSoul, the Frontend Development Club of Chandigarh University, conducted its scheduled **Club Peer Buddy Session on 2 September 2026** as per the timetable and instructions received from the Office of Academic Affairs (OAA), Chandigarh University.

The primary topic of the session was **"Vibe Coding vs Hard Coding."** The session was organised to introduce students to different approaches to software development and discuss how modern AI-assisted coding practices compare with traditional programming and problem-solving approaches.

The session was conducted at **C1 Block, Room 711**, from **3:35 PM to 4:25 PM**. The designated club representatives conducted an interactive discussion with students and encouraged them to understand the differences between AI-assisted development and conventional coding practices.

2. Resource Persons

The following representatives from NexaSoul were assigned to conduct the Peer Buddy Session:

Name	UID	Mobile Number	Assigned Timing
Ayush Negi	24BCS10743	7876710340	3:35 PM – 4:10 PM
Sumanshu Jindal	24BCS11091	9815713417	3:35 PM – 4:10 PM

Both resource persons reported for the assigned activity and remained available for student interaction.

3. Session Objectives

The major objectives of the session were:

- To introduce students to the concept of **Vibe Coding**.
- To explain the fundamentals of traditional or **Hard Coding**.
- To discuss the differences between AI-assisted coding and manually written code.
- To create awareness about the benefits and limitations of both approaches.
- To encourage students to understand the code generated through AI tools rather than relying on it blindly.
- To promote effective problem-solving and programming fundamentals.
- To encourage students to adopt responsible and practical approaches to modern software development.

4. Student Interaction

The session was conducted in an interactive format, allowing students to discuss their understanding of AI-assisted programming and conventional development practices.

Students were encouraged to share their views regarding the use of AI coding tools and discuss situations where manually writing code or using AI assistance could be useful.

The interaction focused on:

- Students' familiarity with AI coding tools.
- Experiences with AI-generated code.
- Understanding programming fundamentals.
- Advantages and limitations of AI-assisted development.
- Importance of debugging and testing.
- Responsible use of AI in software development.

5. Key Observations

The session highlighted the increasing role of AI-assisted tools in software development and the importance of maintaining strong programming fundamentals.

A key observation from the discussion was that students should not depend entirely on generated code without understanding its functionality. Understanding the underlying logic enables developers to review, debug, modify, and improve AI-assisted solutions.

The discussion also demonstrated that traditional coding skills remain relevant even when developers use AI-based tools. A balanced approach involving programming knowledge, logical thinking, and effective use of modern development tools can support practical software development.

6. Conclusion

The **NexaSoul Club Peer Buddy Session held on 2 September 2026** focused on the topic **"Vibe Coding vs Hard Coding."** The session provided students with an opportunity to understand the differences between AI-assisted development and traditional programming practices.

Through discussion and interaction, students were encouraged to recognise the usefulness of modern AI coding tools while also understanding the importance of programming fundamentals, logical thinking, code review, debugging, and independent problem-solving.

The session successfully promoted awareness about evolving software development practices and encouraged students to approach AI-assisted coding with technical understanding and responsibility.
